1. Access your DVOX Manager Account.

Prior to the reception of your DVOX unit, you will receive an email with information regarding your DVOX MANAGER account.

2. Connect your device.

1. Connect your power cable.
2. Plug your Ethernet cable to your network socket.
3. Plug the Ethernet cable to the DVOX LAN Connector.
4. Plug your XLR Audio.
5. Turn on your device.
- Don't forget to whitelist your device on your network.

You are now ready to set up your event using the DVOX MANAGER web management portal.

3. Check your device status

1. On the left side menu, click on *Devices.*
2. Find your device in the list*, and make sure the Status is Online.
* Your device serial number can be found on the sticker at the back of your DVOX device.

4. Creating an event.

1. On the left side menu, click on *Events.*
2. Click on the *New Event* button in the top right corner, you will be sent to the *Event Information* page.
3. Fill in all required fields.
4. Click on the *Create Event* button at the bottom right corner, you will be sent to the *Event Manager* page.

4.1 Setting up a stream.

1. On the top menu, click on the *Layout and Colors* tab.
2. In the preview section, click on the *Add Group* button.
3. In each group, click on *Add Stream* button.

You are now ready to pair your streams with your device.

4.2 Pairing up a stream with your device.

1. On the top menu, click on the *Input Pairing* tab.
2. In the preview, click on the right side of the stream button on the link pictogram.
3. Find the device you want to assign.
4. On the *Stream input pairing* assignment menu (on the right column), click on the + sign button to add devices.
5. Browse and click on the selected devices.
6. Choose which available physical input you want to use.
7. Click on the *Save Changes* button.

5. Final set-up.

Under the *Event Manager* menu , click on the *Visibility* button on the upper right corner and selected either Public or Private from the drop down menu.
You are now live streaming on the DVOX.live platform.

Accessing your event from your personal device.

1. Locate the direct URL of your event (left of the *Visibility* button).
2. Connect to your Wi-Fi network.
3. Using your web browser, browse to the direct URL of your event or scan the event's QR code.
4. Choose your desired stream.
You are now listening to your live stream.
